

April 2026 Monthly Report

Veterinary Vaccine Distribution — Ghana Operations

Presented by: Emelia Awin

Period: April 2026 (in context of January – May 2026)

Date: May 2026

1. New Agrovets Signed In — April 2026

In April 2026, **2 new Agrovets were onboarded** for the first time, bringing new revenue into the business. These customers placed their first recorded invoices during April and were not present in any prior month.

#	Agrovet Name	First Invoice Date	April Revenue	Notes
1	Vic Jeaf Enterprise	10 Apr 2026	GHS 14,400	New customer — first order in April
2	Vetpoint	29 Apr 2026	GHS 9,950	New customer — first order in April

Total Agrovets Served in April

Across all invoices raised in April 2026, **31 unique Agrovets** were served — meaning 31 distinct customers placed or received at least one invoice during the month. This includes the 2 newly onboarded customers listed above.

2. Percentage Growth in Income — Month-on-Month

The table below tracks total invoiced revenue for each month from January to May 2026, along with the percentage change relative to the prior month.

Month	Revenue (GHS)	vs Prev Month	Commentary
January 2026	GHS 628,783	— (baseline)	Strongest opening month of the year
February 2026	GHS 417,194	–33.7%	Sharp post-January dip
March 2026	GHS 420,180	+0.7%	Recovery begins; growth nearly flat
April 2026	GHS 701,192	+67.0%	Best month of the year so far
May 2026 *	GHS 232,598	In progress	Partial month — data still open

* May 2026 figures are as at 26 May 2026 and are not yet complete.

April Was Our Best Month in 2026

April delivered GHS 701,192 — a **67.0% increase** over March and the highest single-month revenue recorded so far in 2026. It also exceeds January by 11.5%, which had previously been the strongest month. April broke the two-month plateau seen in February and March.

Watch the February Dip

February recorded a 33.7% drop from January. This seasonal pattern is worth monitoring — if a similar dip occurs in 2027, proactive order scheduling or targeted outreach in January could help smooth the revenue curve.

3. Revenue Generated in Cash vs Debt — by Month

The table below breaks down each month's total invoiced revenue into the portion already collected in cash and the portion still outstanding as debt.

Month	Total Invoiced	Collected (Cash)	Outstanding (Debt)	Coll. Rate
January	GHS 628,783	GHS 625,353	GHS 3,430	99.5%
February	GHS 417,194	GHS 395,323	GHS 21,872	94.8%
March	GHS 420,180	GHS 296,790	GHS 123,390	70.6%
April	GHS 701,192	GHS 376,344	GHS 324,848	53.7%
May *	GHS 236,438	GHS 0	GHS 236,438	— *

* May collections are not yet recorded. Cash figures will update as payments come in.

January Collections Were Almost Perfect

January had a 99.5% collection rate — virtually all revenue invoiced was paid in the same month. This set a strong cash foundation for the year.

April Debt Is the Largest Single-Month Balance

April has GHS 324,848 outstanding — the largest debt balance of any single month in 2026. With a collection rate of 53.7%, roughly half of April's revenue has not yet been received. Prioritising April follow-ups now will significantly reduce the total outstanding balance.

Overall Collection Rate: 70.5%

Across all five months, total invoiced revenue is GHS 2,403,787. Of this, GHS 1,693,810 has been collected in cash and GHS 709,977 remains as outstanding debt. The overall collection rate is 70.5%, up from 52.3% as of the previous review — a strong improvement driven by January and February clearances.
